

CARING ABOUT OUR CUSTOMERS

CARING ABOUT THE ENVIRONMENT

We are committed to delivering only the finest UK & International courier services, whilst being environmentally conscientious.

We constantly review and actively research the way we operate and have put into practice some essential green procedures in all aspects of our business, without compromising on speed or efficiency.

We are proud to be aligned with Carbon Neutral and their selected science partners who are world leaders in carbon management, emission reduction programmes and sustainable developments.

Our aim is to offer a carbon neutral service which is achieved by offsetting our carbon usage with an investment into climate friendly projects around the World.

We are also committed to being environmentally friendly within our UK offices initiating greener practices into the ways we work by off-setting our company carbon footprint by:

- Fuel conservation through vehicle design and maintenance, using recycled products throughout our packaging and labelling service, cutting waste by refusing and recycling by proper disposal
- Conserving energy through disciplined office practice and reducing paper usage
- The use of push bikes and gas powered vehicles for the longest or shortest collection/delivery journeys
- Invoices and correspondences can be sent electronically to save paper usage
